

Melanotan-2 Dosing Chart

A non-selective melanocortin agonist sold for tanning and libido. Not approved anywhere; unregulated use carries real risks. Commonly discussed doses: 250 mcg–1 mg. Community protocols describe doses in the low hundreds of micrograms. Figures shown are reference points. There is no established or approved dose, and the product is unregulated.

FDA STATUS

Not FDA-approved for any use. Melanotan-2 is not approved in any country and is sold as an unregulated research or cosmetic product.

10 mg vial — units to draw (U-100 syringe)

Water added	mg/mL	250 mcg	500 mcg	1 mg
1 mL	10	2.5 u	5 u	10 u
2 mL	5	5 u	10 u	20 u
3 mL	3.33	7.5 u	15 u	30 u

"—" means the draw exceeds one syringe at that concentration. Interactive calculator for any combination: thelastpeptide.com/peptides/melanotan-2

Melanotan-2 dose figures are commonly discussed reference information with no approved labeling unless stated above. The Last Peptide is an educational reference and sells nothing. Dosing figures shown here are commonly discussed reference information, not prescriptions or medical advice. Many peptides listed are not FDA-approved. Talk to a licensed clinician before using any peptide.
